About P-Esthetic Clinic

Taking good care of yourself is no longer just an accompaniment of cosmetic surgery or of being in the glamour industry. At the P-esthetic Clinic, we believe that everyone has the right to demand the best & so every diagnosis, every procedure, incision & surgery performed has to be right for the person involved. Gone are the days when a 'botched up' plastic surgery could be ascribed to it being just a 'reconstructive' procedure & the patient left with ugly scars to deal with, for life. Unfortunately, cosmetic care is also becoming increasingly associated with and undermined by skin & spa 'salons' & practitioners with dubious credentials. At TheP-esthetic Clinic every procedure is esthetically planned & performed to give the most pleasing results. We believe no procedure is minor & that our clients desire and deserve the best results, irrespective of whether it is orbital surgery or facial plastic surgery for cancer, facial plastic surgery for facial scars & post facial fractures, cosmetic rhinoplasty, laser procedures for skin care or face lift & Botox & filler injections for removing facial wrinkles. Thus, every procedure is an aesthetic one, every patient an aesthetic one, irrespective of the underlying pathology.

Medicine is becoming more and more specialized & you will be reassured to know that our physicians deal only with the areas of their super-specialty – Areas in which they have trained & practiced for many years!

The best dermatologist super-specialized in cosmetic dermatology, The P-esthetic Clinic offers the complete array of surgeries for any abnormality affecting the face and skin care for the entire body. If you can think it, we can do it, so come and experience what world-class medical care means & what it can make possible.
